During the fourth quarter of 2012, the Valuation Committee, which is composed of three independent directors, adjusted the fair values of the private companies in our portfolio. In arriving at these determinations and consistent with the Fund's valuation procedures, and ASC 920 (formerly FAS 157), the Valuation Committee took into account many factors, including the performance of the portfolio companies, recent transactions in the companies' securities, as well as the impact of changes in market multiples within certain sectors.

In fiscal year 2012, the Fund earned approximately \$689,000 in interest income. The Fund reported a net investment loss of approximately \$3.3 million. The Fund reported net realized and unrealized losses on investments of approximately \$11.9 million for the year.

Throughout the year, the Fund continued its efforts to manage its portfolio prudently, including working with its portfolio companies and their management teams to seek to enhance performance and uncover potential exit opportunities.
